International leader in career preparation

Our grads are among the world’s most employable. A Waterloo degree means knowledge, experience, and the confidence to succeed.

Canada’s innovation university

Waterloo has ranked as Canada’s top innovation university for 24 years in a row. Our entrepreneurial ecosystem gives you tools you’ll need to succeed.
DEFINE YOUR INTERESTS
If you’re not sure where to start, explore your options on pages 12 to 19.

CHOOSE YOUR PROGRAM
The detailed program descriptions on pages 20 to 27 help you compare specific programs.

RESEARCH ENTRY REQUIREMENTS
The admission requirements on pages 28 to 29 show you which high school courses and grades you’ll need.

CHOOSE HOW YOU STUDY
Consider the benefits of co-op and experiential learning on pages 4 to 5.

EXPLORE CAREER OPTIONS
See where our grads work after graduation on pages 6 to 7.

LEARN ABOUT STUDENT LIFE
Pages 8 to 11 will give you an overview of our residences, athletics, and clubs.

FINANCE YOUR EDUCATION
Answers to your tuition, scholarship, and financial aid questions are on page 30.

SUBMIT YOUR APPLICATION
Find instructions, deadlines, and tools to help you apply on page 31.

Experts in co-op
More than 6,300 employers hire our co-op students. At Waterloo, you’ll have access to 2,300 more employers than the next largest co-op program in Ontario.
welcome
to your city

All the charm of a small town, with the conveniences of a big city.

The city of Waterloo is a safe and comfortable university town located only 115 kilometres from Canada’s largest metropolitan centre. Living in Waterloo puts you at the heart of an international innovation corridor. You’ll be at the forefront of new businesses and ideas, in a community made up of knowledge-based employers, global think tanks, and post-secondary institutions.

Our future-focused community ranks among the top startup hubs in the world, thanks to entrepreneurial programs like University of Waterloo’s Velocity. This program alone has helped launch more than 100 startups, including Kik, Pebble, and Thalmic Labs.

Why does a Silicon Valley entrepreneur look to Waterloo as a source for brilliant minds and brilliant ideas? Well, it has high intellectual standards, of course, and it values entrepreneurship. But diversity is its indispensable ingredient.

— RT. HON. JUSTIN TRUDEAU, PRIME MINISTER OF CANADA

nearly

60,000
students call our region home

1,845
new tech startups formed in Waterloo over the past 5 years

1,200+
community festivals and events
You're considering the University of Waterloo because you have high standards — for your academics and your student experience. While at Waterloo, your program, faculty, and residence community will become your “home away from home,” making sure you’ll always have a place to belong. To see more of your Waterloo campus and community, check out 

instagram.com/uwaterloolife and instagram.com/uofwaterloo.

getting to know your campus

Program – Your program determines many of your courses and connects you to students with similar interests. You’ll study, conduct labs, give presentations, and perhaps even travel with this group. Some programs even offer Living-Learning Communities where you can live in residence with your classmates.

Faculty – Programs that focus on similar subject areas are grouped into a larger community called a faculty. At Waterloo, your faculty will shape your overall academic and social experience.

University Colleges – Waterloo is home to 4 University Colleges: Conrad Grebel, St. Paul’s, St. Jerome’s, and Renison. They offer an intimate academic and residence community and access to all the resources offered at Waterloo. If you enroll at one, you’ll earn a Waterloo degree.
Already planned out your career? Still not sure what you want to do? Either way, Waterloo co-op gets you off to a great start.

As a co-op student, you can
» learn to answer with confidence and showcase your strengths in job interviews
» explore careers in a number of different fields to find your best fit
» diversify your job experience by applying to international co-op employers
» earn money to help pay for tuition and residence
» bolster your résumé with up to 2 years of relevant work experience
» graduate with a supportive network of professional mentors and references

Alternate between 4-month study and paid work terms
Your co-op schedule depends on your program. Check out the 4 most common study/work sequences in the chart below.

learn by doing

Every Waterloo student has the opportunity to gain the hands-on experience employers want. Whether you opt for co-op or regular, build the experience you’ll need for what’s next through international exchanges, volunteering, labs, case studies, fieldwork, and leadership courses.

Traditional 4-year track
Plan your own summer experiences, enjoy continuity in campus activities, and graduate in only 4 years by enrolling in a traditional study program – at Waterloo, we call it “regular.”

Add global to your degree

**CO-OP**
Co-op opportunities are available in more than 60 countries around the world.

**EXCHANGES**
Choose from over 140 study-abroad opportunities in 36 countries such as the U.K., France, and Singapore.

**PROGRAMS**
Take a course with overseas fieldwork or learn another language – we offer over 100 language courses, one of the largest language course offerings in Canada.

Startup support

Waterloo is an entrepreneur’s paradise – a supportive place to create, develop, and grow your startup. We offer world-class people, resources, and funding that will help you bring your ideas to life.

**VELOCITY**
Find the space, resources, and mentorship you need to turn your idea into a startup through Velocity’s entrepreneurship programs.

**ST. PAUL’S GREENHOUSE**
Put your passion for social innovation and change to work by joining a live-in mentorship program in second year.

**CONRAD ENTERPRISE CO-OP**
Use your co-op term to start your own business and receive ongoing mentoring from the Conrad Business, Entrepreneurship and Technology Centre.
#1 in Canada for graduate employability
- QUACQUARELLI SYMONDS (QS) GLOBAL RANKING 2015

As a Waterloo student, you'll graduate with the skills, workplace experience, and professional network you need to launch your career. Through co-op work terms and off-campus learning opportunities, you'll learn about professions and careers you've never considered.

We asked 3,570 grads where their degrees had taken them. This image shows where Waterloo grads are making a difference. To learn about where a Waterloo degree could take you, check out the career possibilities listed in the program descriptions on pages 20 to 27 or visit uwaterloo.ca/findoutmore/programs.

Continue your studies – choose from 190+ graduate programs
Waterloo is one of the most research-intensive universities in Canada. We're the place industries, institutions, and governments turn to for answers. your waterloo experience

Waterloo is more than just classes and co-op. You have a wide range of choices when it comes to where you live, what you eat, and what you do for fun. Explore your options and make lasting memories.

choose your residence

Find the residence that fits your budget and personality.

uwaterloo.ca/findoutmore/residence

» Do you prefer a traditional residence? Waterloo’s residences offer a variety of room types and provide support, resources, and opportunities to get involved. Plus you can purchase the meal plan that suits your appetite.

» Do you prefer apartment living? Enjoy a great balance of privacy and social interaction in Waterloo’s suite-style residence options. You can choose to add a meal plan or cook for yourself.

» Do you prefer smaller communities? Waterloo’s University College residences offer you a traditional residence life on a smaller scale and an all-you-can-eat meal plan.

If you choose not to live in residence, our Off-Campus Housing staff can support you in finding a place to live.

sample room layouts

Traditional double room
Suite-style living

where to eat

Bubble tea or burgers? Gyros or sushi? There are more than 40 places to eat on or near campus with your meal plan. If you need more options, there are more than 250 restaurants to explore in our city. You’ll also want to check out the UW Farm Market in the fall for fresh locally sourced produce.

getting around town

» Your student card gives you access to city buses.

» Complimentary shuttle services get you across campus.

» Enjoy the speed and convenience of ION, the city’s new Light Rail Transit, coming soon to our campus and community.

» Find tickets and stops for other transit on campus.

14 Living-Learning Communities

Do you want to live with people who have similar interests? Our 14 Living-Learning Communities offer

» academic support and mentoring

» informal dinners with professors

» enrichment activities, such as one-on-one student success planning, study groups, and research workshops
get involved

For the full Waterloo experience, make sure to check out our student clubs, teams, and events. Whatever your interests, Waterloo has something for you.

Clubs
Actor? Dancer? Coder? Juggler? Waterloo has a club for everyone. Choose from more than 200 academic, charitable, social, religious, political, sports, and cultural clubs – or start one of your own! For a full list of clubs, visit feds.ca.

Student government
Develop leadership skills as part of Waterloo’s Federation of Students. Not only does Feds facilitate all Waterloo clubs, they also provide student-run services, offer volunteer and job opportunities, and run major campus events. You’ll see Feds in action when you arrive in September – they run Welcome Week!

Sports
WARRIOR RECREATION
Stay fit and get connected by joining teams, classes, and tournaments offered by Waterloo’s Department of Athletics and Recreation. There are plenty of opportunities to get involved.

2,500 fitness classes per year, including power yoga, cycling, and Pilates
22 instructional classes, including level II yoga, tai chi, and sports skills and drills
14 intramural sports leagues, including basketball, futsal, and dodgeball

Or, stay active your way with 8 squash courts, 7 playing fields, conditioning rooms, fitness studios, an ice rink, bouldering wall, swimming pool, and golf simulator.

Swimming Tennis Track and Field Volleyball

Visit gowarriorsgo.ca for details and schedules.
Have you wondered what to expect when you arrive on campus?

Waterloo students took to Instagram to give you a glimpse of our campus and student life. Follow them from morning to night, keeping in mind your experience will be uniquely yours. For more stories and photos, check out instagram.com/uwaterloolife or use #uwaterloolife to share your journey to Waterloo.

7 am hitting the gym

11 am sharing ideas and blueprints

4 pm study session in the library

6 pm performing with my club

12 pm grabbing lunch on campus

5 pm it’s the climb
Who says you have to choose between going to university and travelling the world?

Whether you want to study, work, volunteer, or simply explore, Waterloo has programs and services that can help you meet your travel goals and fill your passport.
You're eager to explore human nature and understand the world we live in. To look at civilization from the past, from another culture, and from a diverse set of viewpoints.

At Waterloo, you’ll learn how different perspectives and critical thinking can bring about change.

Seaming together passion and experience

Mark knew he wanted to pursue a career in design, he just didn’t know what opportunities were available. Waterloo’s Honours Arts and Business program helped him discover new options. Mark focused on theatre and design, while also studying the practical aspects of business and entrepreneurship. Combining these studies with co-op experience, Mark can enter the costume design industry equipped with skills, industry contacts, and an impressive portfolio.

At Waterloo, we help you fulfill your dreams.

uwaterloo.ca/findoutmore/mark

TWO YEARS AFTER GRADUATING, WATERLOO ARTS GRADS HAVE EMPLOYMENT RATES FROM 92%-100% DEPENDING ON THEIR MAJOR.

- ONTARIO MINISTRY OF TRAINING, COLLEGES AND UNIVERSITIES
Finding success on- and off-court

Russell took his Waterloo experience to the next level. When he wasn’t at varsity football practices or doing work for his Recreation and Sport Business classes, Russell found time to emcee athletic events on campus and develop campaigns to boost Warrior spirit, all the while enhancing his résumé with relevant off-campus jobs.

In all of these experiences, Russell grew his passion for sports entertainment. Shortly after graduation, Russell landed a dream position with Maple Leaf Sports & Entertainment, where he is now responsible for giving Raptors fans a memorable night in Toronto.

At Waterloo, we believe you can do it all.

uwaterloo.ca/findoutmore/russell

business, accounting, and finance

You’ve been told that business is the way to go, but how do you stand out from the crowd? At Waterloo, you can combine practical business knowledge with in-demand technical skills to become the kind of university grad employers are eager to hire.

Learning to seek and seize opportunities

Fourth-year Management Engineering student Hannah wraps up the wonders of Waterloo Engineering in one word: opportunity. As her track record shows, she knows a thing or two about opportunities. A member of the Engineering Federation Committee and President of Waterloo’s Engineering Society ‘B’, Hannah is always looking for ways to get involved. This passion and drive most recently helped her to land a coveted co-op work term placement in New York City, working as a Technology Analyst for Morgan Stanley.

At Waterloo, we bring opportunities to you.

Bringing cotton from the fields of India to the cafés of Waterloo

Sometimes it’s not always clear just how far your influence can reach. Waterloo Environment graduates Carly and Dana extended their skills, savvy, and passion for social justice halfway around the world.

As part of a fourth-year research course, the pair worked with not-for-profit Khadi Organics to help Indian villagers market their sustainable cotton products at a fair price.

With the support of their professors and fellow students, they launched a website, rolled out a social media campaign, and located vendors in the City of Waterloo to carry scarves, napkins, and towels.

At Waterloo, we understand the value of community.

uwaterloo.ca/findoutmore/carly-dana
Keeping students healthy from the inside out

Tina knew how stressful school could be – especially during exams. The fourth-year Health Studies student had struggled to get her own stress under control and wanted to help others cope in a healthy way. Tina pitched her idea for a mental health first aid kit at the Big Ideas Challenge for Health and Wellbeing. Her pitch won her access to St. Paul's GreenHouse community, where she was given the tools and support to bring the idea to life.

The Panic, Anxiety & Stress Support kits, commonly known as PASS kits, were developed in consultation with mental health professionals and distributed to first-year students on campus.

At Waterloo, we believe that change is just around the corner.

Your dream is to explore the global village. In books. In person. In another language. To experience the places and cultures you see in the news. Waterloo can take you behind the headlines.

INTERNATIONAL STUDIES AND LANGUAGES

Your dream. Your degree. Your world.

At Waterloo, your learning can extend beyond campus to the Great Wall of China, the top of the Eiffel Tower, or in Rasha’s case, the busy streets of Vietnam. This International Development student completed an 8-month placement in Hanoi, Vietnam at the Center for Development of Community Initiative and Environment.

As part of the Faculty of Environment’s International Development program, Rasha’s guaranteed overseas placement provided her with the opportunity to not only help an organization make Vietnam more sustainable but also to develop as a future leader.

At Waterloo, you’ll travel far beyond the lecture hall.

**Bringing friends closer through mobile technology**

Imagine taking a picture of your friends and discovering an awkward amount of space between them. Now imagine being able to delete that space without compromising the picture’s quality.

Computer Science major Rudi and Software Engineering student Shida developed a smart resizing app that allows the user to edit out unnecessary spaces in photos – an idea that helped them win the Nokia Imaging Hackathon in Lund, Sweden.

At Waterloo, we like to make things better.

Making yourself at home

Every off-campus student finds an on-campus home. Just ask fourth-year Biology student Ayan. She may live in town with her family, but while at Waterloo the iGEM lab is her home.

Together with Waterloo’s International Genetically Engineered Machines (iGEM) Team, Ayan is building synthetic biology projects that address real-world problems. Outside the lab, Ayan’s interest in genetics has taken her to a conference in the United Kingdom and fueled her participation in a Velocity Science start up.

At Waterloo, we encourage you to explore your passion.

uwaterloo.ca/findoutmore/ayan
MANAGEMENT | FACULTY OF ARTS (E, Bachelor of Accounting and Financial Management) Co-op only

This program is about accounting, finance, and business and how they interrelate. It covers aspects of economics with a practical and professional focus.

Sample courses: Introduction to Global Financial Markets; Corporate Finance; Accounting, Assurance, and the Law

Possible professional designations:
- Chartered Professional Accountant (CPA), Certified Internal Auditor (CIA), Chartered Financial Analyst (CFA), or Chartered Business Valuator (CBV)

Career possibilities:
- Chartered Professional Accountant, Chartered Financial Analyst, research analyst, investment banker

ACCOUNTING AND FINANCIAL MANAGEMENT | FACULTY OF ARTS (W, Major - subject of major interest) apply through entry-level program (E).

W = One-of-a-kind program in Canada.

ARCHITECTURE | SCHOOL OF ARCHITECTURE (E, Bachelor of Architectural Studies) Co-op only

Design the buildings and spaces that enhance the quality and beauty of our world. From the first day of classes, you'll work in a bright studio while examining the close relationship between architecture, the environment, and society.

Sample courses: Design Studio, Cultural History, Visual and Digital Media, Environmental Building Design, Advanced Structures: Design and Analysis

Career possibilities:
- Architect, project manager, designer, architectural assistant

BIOCHEMISTRY | FACULTY OF SCIENCE (M, Bachelor of Science) Co-op available | Also available as a minor

Apply to Life Sciences on your OUAC application

Concentrated biology and chemistry courses along with extensive lab experience will prepare you for a career in forensic science, pharmaceuticals, medical diagnostics and analysis, agriculture, biochemical research, microbiology, biotechnology, or genetic engineering.

Sample courses: Fundamentals of Metabolism, Analytical Chemistry, Environmental and Natural Biochemistry

Career possibilities:
- Toxicologist, biomaterials researcher, health care professional

BIOLOGY | FACULTY OF SCIENCE (M, Bachelor of Science) Co-op available | Also available as a minor | Apply to Life Sciences on your OUAC application

Gain insight into our understanding of life by studying the workings of living organisms, where they come from, and how they evolve and function. Specialize in animal biology, environmental biology, microbiology, biotechnology, plant biology, or molecular genetics.

Sample courses: Plants and Civilization, Organismal and Evolutionary Ecology, Diversity of Life

Career possibilities:
- Biologist, veterinarian, environmental consultant, physician, pharmacist, optometrist

BIOMEDICAL ENGINEERING | FACULTY OF ENGINEERING (E, Bachelor of Applied Science) Co-op only

Use engineering principles in biology, mechanics, physics, system analysis, and design to improve health care and quality of life. In this interdisciplinary program, you'll get hands-on experience studying biological and medical systems. By graduation, you'll be prepared for a variety of careers creating new technologies for health care or athletics.

Sample courses: Introduction to Biomedical Design, Engineering Biology, Anatomical Systems Modelling

Possible professional designation:
- Professional Engineer

Career possibilities:
- Research and development of medical devices, biomedical data analysis, product design of sporting equipment

BIOMEDICAL SCIENCES | FACULTY OF SCIENCE (M, Bachelor of Science) Apply to Life Sciences on your OUAC application

Get ready for your career in health with this flexible program that provides the foundation and experience required to succeed in virtually any professional health program in North America.

Sample courses: Human Anatomy, Biology of Human Aging, Cell Biology of Human Disease

Career possibilities:
- Pharmacist, optometrist, physician
why study “just” business?

6,300 global employers shaped the curriculum of our business, finance, and accounting programs. Graduate with the specialized knowledge and business proficiency employers want. Choose a business-related program, or customize your degree with relevant business courses, and set yourself up for success.

20% of Waterloo undergraduate students are studying business, finance, or accounting

PROGRAM DETAILS
PROGRAM DETAILS

COMPUTATIONAL MATHEMATICS | FACULTY OF MATHEMATICS (M, Bachelor of Mathematics) Co-op available | Also available as a minor
Combine math and computer science to develop skills in the computer modelling of mathematical problems found in business, economics, engineering, finance, medicine, and science. Use computing to solve industrial-sized math problems.
Sample courses: Data Structures and Data Management, Logic and Computation, Computer Simulation of Complex Systems
Career possibilities: Project manager, enterprise architect, software developer

COMPUTER ENGINEERING | FACULTY OF ENGINEERING (E, Bachelor of Applied Science) Co-op only
Build and test computer hardware and software, and work with larger engineered systems in distributed, networked environments. You'll explore cutting-edge topics and get experience in state-of-the-art labs that reflect modern research and development, like wireless systems and smart homes.
Sample courses: Digital Circuits and Systems, Operating Systems and Systems Programming, Computer Networks
Possible professional designation: Professional Engineer
Career possibilities: Design of computer or software architecture, manufacturing telecommunication devices, creation of application software

COMPUTER SCIENCE | SCHOOL OF COMPUTER SCIENCE (E, M, Bachelor of Computer Science or Bachelor of Mathematics) Co-op available | Also available as a minor
While building a comprehensive foundation on the principles of computer science, you'll learn how to design, analyze, and implement innovative software for modern computer systems and have the flexibility to explore exciting application areas.
Sample courses: Designing Functional Programs, Data Structures and Data Management, Operating Systems
Possible professional designation: Canadian Information Processing Society
Career possibilities: Software developer, web developer, project manager

W - COMPUTING AND FINANCIAL MANAGEMENT | FACULTY OF ARTS | FACULTY OF MATHEMATICS (E, Bachelor of Computing and Financial Management) Co-op only
Develop expertise in both computer science and finance. Combine this interdisciplinary knowledge with 6 co-op work terms in software development, banking, investments, risk management, or insurance to become a versatile professional in the marketplace.
Sample courses: Object-Oriented Software Development, Regression and Forecasting Methods in Finance, Equity Investments
Possible professional designations: Canadian Information Processing Society (CIPS), Chartered Financial Analyst (CFA)
Career possibilities: Software developer, quantitative analyst, investment banking analyst

EARTH SCIENCES | FACULTY OF SCIENCE (M, Bachelor of Science) Co-op available | Also available as a minor | Also available as a major | Apply to Physical Sciences on your OUAC application
Explore the world under your feet in close-knit classes and on field trips taught by professors known internationally for their geological and water research.
Sample courses: Geomorphology and GIS Applications, Volcanology and Igneous Petrology, Earth from Space Using Remote Sensing
Career possibilities: Hydrogeologist, geologist, geophysicist

ECONOMICS | FACULTY OF ARTS (M, Bachelor of Arts) Co-op available if you enroll in Honours Arts or Honours Arts and Business
Learn how wealth is produced, distributed, and consumed and how it shapes society, politics, and culture. Courses cover finance, public policy, and international economics.
Sample courses: Economic of Sport, Business Finance, Marketing and Consumer Economics
Career possibilities: Financial planner, manager of marketing research, financial analyst, economist, manager of international finance

ELECTRICAL ENGINEERING | FACULTY OF ENGINEERING (E, Bachelor of Applied Science) Co-op only
Master electronic and electromagnetic design principles and build the latest technologies in power, information, and energy. You'll explore electronic devices, control systems, and digital systems in labs. By graduation, you'll be ready to design, build, and integrate reliable and efficient technologies for a range of industries.
Sample courses: Digital Circuits and Systems, Electromagnetic Fields and Waves, Embedded Microprocessor Systems
Possible professional designation: Professional Engineer
Career possibilities: Product development of telecommunications systems, software quality assurance analysis, electric equipment manufacturing

ENGLISH | FACULTY OF ARTS (M, Bachelor of Arts) Co-op available if you enroll in Honours Arts or Honours Business
Examine English literature, language, and new media while developing your ability to professionally communicate and persuade.
Choose from Specializations: Digital Media Studies or English Literature in a Global Context
Career possibilities: Communications manager, media relations specialist, technical writer, publisher, social media strategist

W - ENVIRONMENT AND BUSINESS | FACULTY OF ENVIRONMENT (E, Bachelor of Environmental Studies) Co-op only
Stand out to future employers with your business acumen and understanding of environmental issues. Gain expertise in stakeholder engagement, industrial ecology, and environmental decision-making while developing core business skills in finance, project management, accounting, marketing, and law.
Sample courses: International Corporate Responsibility, Green Entrepreneurship, Business Finance
Career possibilities: Environmental and regulatory advisor, sustainability analyst, environmental stewardship manager

ENVIRONMENT, RESOURCES AND SUSTAINABILITY | FACULTY OF ENVIRONMENT (E, Bachelor of Environmental Studies) Co-op available | Also available as a minor
Use insights from the natural, physical, and social sciences to help solve some of the world's biggest environmental challenges, from water and food to energy and biodiversity. Learn about preserving and restoring ecosystems and explore issues in environmental politics, policy, and governance.
Sample courses: The Politics of Sustainable Communities, Environmental Analysis and Solutions, Ecosystem Assessment
Possible professional designations: Diploma in Environmental Assessment, Diploma in Ecological Restoration and Rehabilitation
Career possibilities: Terrestrial and wetland biologist, sustainability policy analyst, sustainable energy consultant

ENVIRONMENTAL ENGINEERING | FACULTY OF ENGINEERING (E, Bachelor of Applied Science) Co-op only
Explore a combination of environmental and engineering-related courses, and use sustainable engineering practices to prevent pollution, treat waste water, restore watersheds, and more. You'll get a broad education in environmental sciences while developing quantitative skills to manage, protect, and rehabilitate our natural world.
Sample courses: Earth Engineering, Environmental and Sustainability Assessment, Environmental Modelling
Possible professional designation: Professional Engineer
Career possibilities: Product design for air pollution control systems, process design for water treatment, transportation and infrastructure planning

ENVIRONMENTAL SCIENCE | FACULTY OF SCIENCE (E, Bachelor of Science)
Ranked among the top 5 in Canada, this program provides learning in the lab and field, giving you a scientist’s perspective on ecological and geological systems. Option to specialize in ecology or geoscience. Accredited by the Association of Professional Geoscientists of Ontario.
Sample courses: Organismal and Evolutionary Ecology, Mineralogy, Applied Wetland Science
Career possibilities: Geoscientist, ecologist, environmental consultant

FINE ARTS | FACULTY OF ARTS (M, Bachelor of Arts) Co-op available if you enroll in Honours Arts and Business
Develop a critical understanding of art through painting, drawing, sculpture, printmaking, computer imaging, art history, and film studies. Add the Teaching Specialization to earn a Bachelor of Education. Choose Visual Culture or Studio Practice as your major.
Sample courses: History of Film and Visual Media, Observational Drawing, Digital Imaging
Career possibilities: 3D visual effects artist, illustrator, teacher, web designer, curator, interior designer, art therapist
FRENCH | FACULTY OF ARTS (M, Bachelor of Arts) Co-op available if you enroll in Honours Arts and Business
Obtain valuable language skills for careers in government or business. You can include a year of study in Québec or France, or choose the French Teaching Specialization to add a Bachelor of Education from Nipissing University.
Sample courses: Introduction to Translation, Business French, Children's Literature in French
Career possibilities: Director of international sales, immigration officer, insolvency administrator, translator, teacher

W - GEOGRAPHY AND AVIATION | FACULTY OF ENVIRONMENT (E, Bachelor of Environmental Studies)
Earn a Bachelor of Environmental Studies while completing flight training to acquire your Commercial Pilot Licence. Gain a deep understanding of landforms, weather patterns, and the computer technology behind tools such as geographic information systems (GIS) and remote sensing.
Sample courses: Geography and Our Planetary Environment, Principles of GIScience, Professional Pilot Program Course
Possible professional designation: Students graduate with a Commercial Pilot Licence
Career possibilities: King Air 350 co-pilot, pilot, flight training instructor

GEODESIC ENGINEERING | FACULTY OF ENVIRONMENT (E, Bachelor of Environmental Studies) Co-op available if you enroll in Honours Arts and Business
Combine German language, communications, and cultural studies. Develop valuable skills for careers in international business and government. Enhance your experience by studying in Germany.
Sample courses: German through Comics, German for Professional Purposes, German Filmmakers in Hollywood
Career possibilities: Editor and communications manager, business analyst, sales manager

GLOBAL BUSINESS AND DIGITAL ARTS | FACULTY OF ARTS (E, Bachelor of Global Business and Digital Arts)
Lead business into the future using the power of digital media. Study cross-cultural communication and management, digital design, and emerging technologies. Enhance your studies with a paid internship. Spend 2 years at the Waterloo campus and then 2 years at our digital media campus in nearby Stratford.
Sample courses: Digital Media Design and Production, Marketing in the Digital World, Applied Leadership and Management
Possible professional designation: Work towards project management certification
Career possibilities: User experience designer, social media manager, digital marketing specialist, project manager

HEALTH STUDIES | FACULTY OF APPLIED HEALTH SCIENCES (E, Bachelor of Science) Co-op available
Prepare for professional health programs such as medicine, pharmacy, and nursing. Learn how to prevent disease by studying the factors that determine health and illness.
Sample courses: Psychological Determinants of Health; Development, Aging, and Health; Environmental Toxicology and Public Health
Specializations: Gerontology, Health Informatics, Health Research Professions
Career possibilities: Health professional (medical doctor, nurse, epidemiologist, occupational therapist, midwife, genetic counsellor), research coordinator, health informatics consultant

HISTORY | FACULTY OF ARTS (M, Bachelor of Arts) Co-op available if you enroll in Honours Arts or Honours Arts and Business
Go back in time and see for yourself that history is more than just memorizing facts. You’ll develop analytical skills and a knack for seeing patterns from the past that can influence the future. Focus on Canadian, American, European, or international history.
Sample courses: Rock ‘n’ Roll and US History, Russia: From Tsars to Putin, Aboriginal History of Canada
Specializations: Global Interactions; Revolution, War, and Upheaval; Applied History; or International Relations
Career possibilities: Government affairs manager, executive researcher, lawyer, director of government relations

HONOURS ARTS | FACULTY OF ARTS (E, Bachelor of Arts)
With 23 majors, Honours Arts provides choice and flexibility. Explore a variety of Arts subjects or select a major and immerse yourself in the humanities, social sciences, fine and performing arts, and languages and cultures. Co-op is available in some majors. Refer to your specific major of interest (M) for course listings and career possibilities.

W - HONOURS ARTS AND BUSINESS | FACULTY OF ARTS (E, Bachelor of Arts) Co-op available
Combine one of 23 Honours Arts majors with business-related studies. Choose co-op and be a part of the largest co-op program in the world. Refer to your specific major of interest (M) for sample courses and career possibilities.
Possible professional designation: Work towards project management certification

INTERNATIONAL DEVELOPMENT | FACULTY OF ENVIRONMENT (E, Bachelor of Environmental Studies) Also available as a minor
Be a catalyst for change. Tackle problems of economic inequality, social injustice, and environmental change, and apply your skills on an 8-month overseas placement.
Sample courses: Problem-Solving for Development, Marketing and Communication for Development Agents, Introduction to Social Entrepreneurship
Career possibilities: NGO program manager, international partnership manager, grant officer

INFORMATION TECHNOLOGY MANAGEMENT | FACULTY OF MATHEMATICS (M, Bachelor of Mathematics) Co-op available | Also available as a minor
Combine technical courses in computer science with business courses such as marketing, project management, and statistics. Graduate with the ability to apply current IT solutions to business processes.
Sample courses: Management Information Systems, Management of Business Organization, Organizational Design and Technology
Career possibilities: Business systems analyst, web developer, general manager

INTERDISCIPLINARY STUDIES | FACULTY OF ENVIRONMENT (E, Bachelor of Arts)
Design your own degree. If you’re still exploring which sciences intrigue you the most, take Honours Science and switch to a more specialized program like Chemistry or Biology later. Or, you can keep the program general, becoming an interdisciplinary scientist by taking lots of electives in Science and other faculties.
Sample courses: Cell Biology, The Physics of How Things Work, Geochemistry
Career possibilities: Physician, optometrist, pharmacist, genetic counsellor, teacher

MATHEMATICS | FACULTY OF ENVIRONMENT (E, Bachelor of Science)
Possible professional designation: Refer to your specific major of interest (M) for course listings and career possibilities.

GERMAN | FACULTY OF ARTS (M, Bachelor of Arts) Co-op available if you enroll in Honours Arts and Business
Possible professional designation: Refer to your specific major of interest (M) for course listings and career possibilities.
KINESIOLOGY | FACULTY OF APPLIED HEALTH SCIENCES (E, Bachelor of Science)  Co-op available
Prepare for professional health programs such as medicine, physiotherapy, and chiropractic. Study the multidisciplinary science of human movement and learn how to prevent, assess, and treat movement-related illness and injury.
Sample courses: Human Anatomy; Limbs and Trunk; Clinical Neurophysiology; Fundamentals for Rehabilitation of Human Movement; Musculoskeletal Injuries in Work and Sport.
Specializations: Ergonomics and Injury Prevention, Human Nutrition, Pre-Health Professions, Rehabilitation Sciences
Possible professional designation: Prepared to register as a kinesiologist (Ontario)
Career possibilities: Health professional (medical doctor, physical therapist, occupational therapist, athletic therapist, kinesiologist, chiropractor), ergonomist, rehabilitation specialist

W - KNOWLEDGE INTEGRATION | FACULTY OF ENVIRONMENT (E, Bachelor of Knowledge integration) Also available as a minor
More than a traditional arts and science program, Knowledge Integration lets you explore and integrate your many interests. Pursue a traditional specialization or create one that is uniquely yours. Develop skills in design thinking, creative problem solving, and collaboration to make a difference in the world.
Sample courses: The Social Nature of Knowledge, Creative Thinking, Real World Problem Solving.
Career possibilities: Business analyst, design strategist, user experience researcher

LEGAL STUDIES | FACULTY OF ARTS (M, Bachelor of Arts) Co-op available if you enrol in Honours Arts and Business
Understand the origins and impact of legal systems from the viewpoint of political science, history, sociology, philosophy, and peace and conflict studies. You’ll develop an appreciation of the role of law in society and explore it as a career option.
Sample courses: Criminology, Women and the Law, Children’s Rights in Canada
Career possibilities: Legal assistant, records clerk, executive researcher, probation and parole officer, lawyer

LIFE PHYSICS | FACULTY OF SCIENCE (M, Bachelor of Science) Co-op available
Also available as a minor (biophysics) | Apply to Life Sciences on your OUAC application
Prepare for professions that harness the power of physics, such as radiation oncology and medical imaging. If you enjoy biology and physics and are interested in health-related careers, this program may be a perfect fit.
Sample courses: Medical Physics; Biophysics of Imaging, Special Topics in Life, Medical and Biophysics
Career possibilities: Medical physicist, physician, biophysicist

LIFE SCIENCES | FACULTY OF SCIENCE (E, Bachelor of Science)
An OUAC entry program leading to the following majors (M) that begin in your first year: Biochemistry, Biology, Biomedical Sciences, Life Physics, or Psychology. Refer to your specific major for details.

W - MANAGEMENT ENGINEERING | FACULTY OF ENGINEERING (E, Bachelor of Applied Science) Co-op only
Discover how to move beyond traditional approaches to management using engineering practices. You’ll design and implement the systems on which organizations depend while studying information technologies, business strategy, and economic trends. You’ll become an invaluable asset, with the ability to optimize management systems to make organizations more efficient and profitable.
Sample courses: Work Design and Facilities Planning, Managerial and Cost Accounting, Organizational Behaviour
Possible professional designation: Professional Engineer
Career possibilities: Design and implementation of information technologies, operations research, and development of new strategies

MATHEMATICAL PHYSICS | FACULTY OF SCIENCE (M, Bachelor of Science) Co-op available | Apply to Physical Sciences on your OUAC application
Prepare for a career that ranges from the theoretical foundations of quantum technologies to the mathematically intensive unified theories of nature. This program is similar to the Physics program but with an emphasis on the mathematical and theoretical sides of physics.
Sample courses: Modern Physics, Quantum Theory, Introduction to General Relativity
Career possibilities: Theoretical physicist, data scientist, quantitative analyst

MATHEMATICS | FACULTY OF MATHEMATICS (E, Bachelor of Mathematics) Co-op available
Mathematics is an entry program that leads to the following math majors (M): Actuarial Science, Applied Mathematics, Combinatorics and Optimization, Computational Mathematics, Computer Science, Mathematical Optimization, Mathematical Studies, Mathematics/Teaching, Pure Mathematics, Statistics

MATHEMATICS/BUSINESS ADMINISTRATION | FACULTY OF MATHEMATICS (E, Bachelor of Mathematics) Co-op available
Combine courses in math and computer science with business and economics courses from nearby Wilfrid Laurier University. You’ll be prepared to take on the world of business with your technical expertise.
Sample courses: Corporate Finance, Introduction to Managerial Accounting, Organizational Behaviour
Career possibilities: Operations manager, risk modelling analyst, investor relations specialist

W - MATHEMATICS/CHARTERED PROFESSIONAL ACCOUNTANCY | FACULTY OF MATHEMATICS (E, Bachelor of Mathematics) Co-op only
Earn a Bachelor of Mathematics as you prepare for a career as a Chartered Professional Accountant (CPA). Acquire a strong background in the mathematical field of your choice, complemented by equally focused studies in accounting, economics, and business.
Sample courses: Introduction to Financial Accounting, Cost Management Systems, Corporate Finance
Career possibilities: Chartered Professional Accountant (CPA), controller, auditor

MATHEMATICAL PHYSICS | FACULTY OF SCIENCE (M, Bachelor of Science) Co-op only
Prepare for graduate studies or a career in the semiconductor industry, telecommunications, or medical technology. The focus is on the advanced math needed for the study of physics and includes courses in computational mathematics or computer science.
Sample courses: Waves, Electricity, and Magnetism; Introduction to Theoretical Mechanics; Quantum Theory
Career possibilities: Operations specialist, information technology architect, lecturer

MATHEMATICAL PHYSICS | FACULTY OF SCIENCE (M, Bachelor of Science) Co-op available
Prepare for careers that range from the theoretical foundations of quantum technologies to the mathematically intensive unified theories of nature. This program is similar to the Physics program but with an emphasis on the mathematical and theoretical sides of physics.
Sample courses: Modern Physics, Quantum Theory, Introduction to General Relativity
Career possibilities: Theoretical physicist, data scientist, quantitative analyst

MATHEMATICS | FACULTY OF MATHEMATICS (E, Bachelor of Mathematics) Co-op available
Mathematics is an entry program that leads to the following math majors (M): Actuarial Science, Applied Mathematics, Combinatorics and Optimization, Computational Mathematics, Computer Science, Mathematical Optimization, Mathematical Studies, Mathematics/Teaching, Pure Mathematics, Statistics

MATHEMATICS/BUSINESS ADMINISTRATION | FACULTY OF MATHEMATICS (E, Bachelor of Mathematics) Co-op available
Combine courses in math and computer science with business and economics courses from nearby Wilfrid Laurier University. You’ll be prepared to take on the world of business with your technical expertise.
Sample courses: Corporate Finance, Introduction to Managerial Accounting, Organizational Behaviour
Career possibilities: Operations manager, risk modelling analyst, investor relations specialist

W - MATHEMATICS/CHARTERED PROFESSIONAL ACCOUNTANCY | FACULTY OF MATHEMATICS (E, Bachelor of Mathematics) Co-op only
Earn a Bachelor of Mathematics as you prepare for a career as a Chartered Professional Accountant (CPA). Acquire a strong background in the mathematical field of your choice, complemented by equally focused studies in accounting, economics, and business.
Sample courses: Introduction to Financial Accounting, Cost Management Systems, Corporate Finance
Career possibilities: Chartered Professional Accountant (CPA), controller, auditor
**W - MATHEMATICS/FINANCIAL ANALYSIS AND RISK MANAGEMENT | FACULTY OF MATHEMATICS (E, Bachelor of Mathematics)**
Co-op available
Combine mathematics with finance, accounting, economics, and risk management to prepare for a career in banking, investment management, and risk management. Specialize in either chartered financial analysis or risk management, and prepare for professional exams such as the Chartered Financial Analyst exam.

*Sample courses:* Computational Methods in Business and Finance, Applied Linear Models and Process Improvement for Business, Commercial and Business Law for Mathematics Students

*Career possibilities:* Financial analyst, risk analyst, investment analyst

---

**MATHEMATICS/TEACHING | FACULTY OF MATHEMATICS (M, Bachelor of Mathematics)**
Co-op only
Share your love of math and become a mathematics teacher. Combine your math, statistics, and computer science courses with practical classroom experience.

*Sample courses:* Introduction to Mathematics Education, Educational Psychology, Mathematical Discovery and Invention

*Career possibilities:* Teacher, online learning consultant, instructional media developer

---

**MECHANICAL ENGINEERING | FACULTY OF ENGINEERING (E, Bachelor of Applied Science)**
Co-op only
Study and harness the power of mechanical design, with a wide range of engineering topics and labs that let you get your hands dirty. You’ll consider a range of factors, including the environment, safety, manufacturing processes, and materials, to create mechanical systems that improve human life.

*Sample courses:* Structure and Properties of Materials, Electromechanical Devices and Power Processing, Heat Transfer

*Possible professional designation:* Professional Engineer

*Career possibilities:* Design of aerospace accessories, manufacturing of wind turbines, research and development in automotive technologies

---

**MECHANATRONICS ENGINEERING | FACULTY OF ENGINEERING (E, Bachelor of Applied Science)**
Co-op only
Combine mechanical, electrical, computer, and software engineering to build smart machines like robots, intelligent vehicles, and aerospace control systems. In Canada’s only full Mechatronics Engineering program, you’ll get practice through labs and co-op, letting you dissect and build electro-mechanical devices, starting in your first year.

*Sample courses:* Sensors and Instrumentation, Microprocessors and Digital Logic, Structure and Properties of Materials

*Possible professional designation:* Professional Engineer

*Career possibilities:* Manufacturing and programming of robotic devices, design of biomedical instruments, design and creation of wearable technology

---

**MEDICINAL CHEMISTRY | FACULTY OF SCIENCE (M, Bachelor of Science)**
Co-op only | Apply to Physical Sciences on your OUAC application
Explore the science of drug discovery in this exciting program that includes learning in computer-aided drug design. Train as a chemist who can design, synthesize, and evaluate potential drugs.

*Sample courses:* Structure and Bonding, Transition Element Compounds and Inorganic Materials, Medicinal Chemistry

*Career possibilities:* Medicinal chemist, research chemist, synthetic chemist

---

**MEDIEVAL STUDIES | FACULTY OF ARTS (M, Bachelor of Arts)**
Co-op available if you enroll in Honours Arts and Business
Gain knowledge of the Middle Ages, which is vital to understanding modern civilization. Areas of study include history, Latin, modern European languages, fine arts, philosophy, religious studies, and classical studies.

*Sample courses:* Medieval Society, Great Works: Ancient and Medieval, Old English

*Career possibilities:* Professional writer, librarian, historical site manager, teacher

---

**MUSIC | FACULTY OF ARTS (M, Bachelor of Arts)**
Co-op available if you enroll in Honours Arts and Business
Understand music’s importance in today’s world through theory, composition, performance, and history. Combine your passion for music with other interests by taking courses that address the vital intersection of music and technology, film, global culture, and psychology.

*Sample courses:* Music Cognition, Introduction to Jazz, Soundtracks: Music in Film

*Career possibilities:* Teacher, performer, associate pastor of music, music store owner, recording studio owner

---

**W – NANOTECHNOLOGY ENGINEERING | FACULTY OF ENGINEERING (E, Bachelor of Applied Science)**
Co-op only
Combine ideas from chemistry, electronics, quantum physics, and biology with engineering principles to create new technologies at the nanometre scale. You’ll explore a new world of materials to make more efficient technologies, while gaining interdisciplinary knowledge that could take you into almost any industry; food processing, consumer goods, and even medicine.

*Sample courses:* Nanotoxicology, Societal and Environmental Impacts of Nanotechnology, Quantum Mechanics

*Possible professional designation:* Professional Engineer

*Career possibilities:* Research and development for pharmaceuticals, design of advanced materials for electronic devices, manufacturing of medical instruments

---

**W – OPTOMETRY | SCHOOL OF OPTOMETRY (Doctor of Optometry)**
Regular only | Apply to a recommended Bachelor of Science program to meet requirements | Offered by Waterloo’s School of Optometry
Help preserve and enhance vision as an optometrist. After 3 years in a Bachelor of Science program, you can apply to Canada’s only English-language Doctor of Optometry program. Learn about ocular health and disease, optics, and vision, while applying your knowledge in clinical settings.

*Sample courses:* Optometry Clinics, Practice Management, Physiology of the Eye

*Career possibilities:* Registered optometrist; work in private practice, academia, or industry

---

**PEACE AND CONFLICT STUDIES | FACULTY OF ARTS (M, Bachelor of Arts)**
Co-op available if you enroll in Honours Arts and Business
Develop diverse approaches to understanding conflict and promoting peace through Canada’s first peace studies program. Discover how to transform conflict’s violent potential into a creative force for positive change. Gain experience through an internship locally or abroad.

*Sample courses:* Human Rights, Peace, and Business, Conflict Resolution, Restorative Justice; Gender in War and Peace

*Career possibilities:* Community development officer, international development specialist, social services worker, policy advisor, mediation consultant, lawyer

---

**W – PHARMACY | SCHOOL OF PHARMACY (Doctor of Pharmacy)**
Co-op only | Apply to a recommended Bachelor of Science program to meet requirements | Offered by Waterloo’s School of Pharmacy
Train to be a pharmacist through classroom and clinical rotations. After 2 years in a science program, you can apply to Canada’s newest and only co-op Pharmacy program, enhancing your learning on paid work terms and acquiring sought-after skills in community practice, hospitals, or family health teams.

*Sample courses:* Integrated Patient Focused Care, Professional Practice, Clinical Rotation: Primary Care

*Career possibilities:* Registered pharmacist; work in community practice, hospitals, or family health teams

---

**PHILOSOPHY | FACULTY OF ARTS (M, Bachelor of Arts)**
Co-op available if you enroll in Honours Arts and Business
Study topics ranging from ancient texts to emerging issues in science and technology. Learn to analyze other people’s arguments and improve your own. The critical-thinking skills you’ll develop are in demand in public policy, industry, and beyond.

*Sample courses:* Theories of Knowledge, Probability and Decision Making, Philosophy of Mind

*Career possibilities:* Lawyer, public policy analyst, ethicist, corporate archivist

---

**PHYSICAL SCIENCES | FACULTY OF SCIENCE (E, Bachelor of Science)**
An OUAC entry program leading to the following majors (M) that begin in your first year: Chemistry, Earth Sciences, Materials and Nanosciences, Mathematical Physics, Medicinal Chemistry, Physics, or Physics and Astronomy. Refer to your specific major for details.

**PHYSICS | FACULTY OF SCIENCE (M, Bachelor of Science)**
Co-op available | Also available as a minor | Apply to Physical Sciences on your OUAC application
Physics is about understanding how the universe works: from quantum particles, quantum computing, and exotic states of matter to Einstein’s curved spacetime and black holes. In one of Canada’s largest and most comprehensive physics programs, prepare for graduate studies or a wide range of careers requiring advanced problem-solving skills.

*Sample courses:* Scientific Measurement and Control, Classical Mechanics and Special Relativity; Introduction to Particle Physics

*Career possibilities:* Physicist, research and development scientist, physics teacher
PHYSICS AND ASTRONOMY | FACULTY OF SCIENCE (M, Bachelor of Science) Co-op available | Apply to Physical Sciences on your OUAC application From black holes to the Big Bang, astronomers study the most fascinating phenomena in the universe. Learn from professors who are using satellites and telescopes to explore space. Prepare for careers in astrophysics and space science or for graduate studies in astronomy or physics. Sample courses: Introduction to the Universe, Computational Physics, Cosmology Career possibilities: Astronomer, aerospace scientist, remote sensing scientist

PLANNING | FACULTY OF ENVIRONMENT (E, Bachelor of Environmental Studies) Co-op only Tackle the environmental and social challenges facing our cities and rural areas. You'll gain skills in effective transit planning and sustainable planning practices and study topics such as economics, law, design, and health. Sample courses: Social Concepts in Planning, Transportation Planning and Analysis, Urban Planning Design and the Environment Possible professional designation: Accredited by the Canadian Institute of Planning Career possibilities: Environmental planner, land use planner, urban designer, transit planner

POLITICAL SCIENCE | FACULTY OF ARTS (M, Bachelor of Arts) Co-op available if you enroll in Honours Arts or Honours Arts and Business Explore political power, global politics and governance, citizens and their relationship to governments, and political theory. Your newfound knowledge of politics and its many systems and cultures will make a difference to employers looking for critical thinkers and creative problem solvers. Sample courses: Globalization, International Business, and Development, Politics and Business, Global Environmental Governance Specializations: Politics and Business, Global Governance, Public Policy and Administration, International Relations Career possibilities: Civil servant, director of global programs, project manager, senior consultant

PSYCHOLOGY | FACULTY OF ARTS (M, Bachelor of Science) Co-op available | Also available as a minor | Apply to Life Sciences on your OUAC application | Also available as a Bachelor of Arts in the Faculty of Arts Explore the mind in one of North America’s top psychology departments. Study a range of disciplines – neuroscience, cognition, clinical, developmental, and social. A BSc in psychology will prepare you for further training in medicine, speech pathology, or other health-related fields. Sample courses: Psychopathology, Genetics, Developmental Psychology Career possibilities: Neuroscientist, child psychologist, psychiatrist

PUBLIC HEALTH | FACULTY OF APPLIED HEALTH SCIENCES (E, Bachelor of Public Health) Co-op available Learn about the many determinants, biological and otherwise, that influence the health of individuals and groups and how to influence these factors to improve the health and well-being of others. Sample courses: Social Determinants of Health, Global Health, Community Learning Project Specializations: Gerontology, Health Informatics, Health Research Career possibilities: Community relations officer, public health planner, policy developer

PURE MATHEMATICS | FACULTY OF MATHEMATICS (M, Bachelor of Mathematics) Co-op available | Also available as a minor Study the power, elegance, “how,” and “why” of math. Specialize in finance or mathematics teaching. Sample courses: Fields and Galois Theory; Complex Analysis; Differential Geometry Career possibilities: Data scientist, operations analyst, lecturer

RECREATION AND LEISURE STUDIES | FACULTY OF APPLIED HEALTH SCIENCES (E, M, Bachelor of Arts) Co-op available Explore leisure and its relationship to individual and community well-being. Learn how to plan, deliver, and manage recreation services that facilitate meaningful engagement. Choose from 4 majors (M): Recreation and Leisure Studies, Recreation and Sport Business, Therapeutic Recreation, and Tourism Development. Sample courses: Program Management and Evaluation; Play, Creativity, and Child Development; Diversity and Leisure Career possibilities: Manager of community services, program and support services manager, recreation manager

RECREATION AND SPORT BUSINESS | FACULTY OF APPLIED HEALTH SCIENCES (M, Bachelor of Arts) Co-op available Combine your expertise in recreation and sport with transferable business skills in marketing, human resources, communications, management, and finance. Prepare for a career in commercial, not-for-profit, or public recreation and sport. Sample courses: Principles of High Performance Organizations in Recreation and Sport, Leisure and Community, Mobilizing Resources for Recreation and Sport Delivery Career possibilities: Community events manager, marketing manager, sport programming manager

RELIGIOUS STUDIES | FACULTY OF ARTS (M, Bachelor of Arts) Co-op available if you enroll in Honours Arts and Business Explore the religious dimensions of human experience to gain an understanding of yourself and others. Discover the world’s great religions through courses in Western and Eastern religions, the history of Christianity, Biblical studies, theology, ethics, sociology, and religion and the arts. Sample courses: Sacred Spaces and Human Geographies, Religion in Popular Film, Love and Friendship Career possibilities: Clinical therapist, interfaith chaplain, international development agency director

W – SCIENCE AND AVIATION | FACULTY OF SCIENCE (E, Bachelor of Science) Earn a Bachelor of Science while completing flight training and receive your Commercial Pilot Licence. Focus on physics or earth sciences, or customize your studies to include courses from a range of scientific disciplines. Sample courses: Advanced Remote Sensing Techniques, Professional Pilot Program Course, The Physics of How Things Work Possible professional designation: Students graduate with a Commercial Pilot Licence Career possibilities: King Air 350 co-pilot, pilot, flight training instructor

W – SCIENCE AND BUSINESS | FACULTY OF SCIENCE (E, Bachelor of Science) Co-op available This one-of-a-kind program in Canada provides a strong foundation in science, along with courses in accounting, economics, marketing, computing, statistics, and human resources. Become a scientist with solid business and presentation skills or a business professional who speaks the language of science. Sample courses: Principles of Marketing and Consumer Economics, Technology Development Workshop, Principles of Molecular Biology Career possibilities: Medical information specialist, biotech accounts manager, pharmaceutical chemist

SEXUALITY, MARRIAGE, AND FAMILY STUDIES | FACULTY OF ARTS (M, Bachelor of Arts) Co-op available if you enroll in Honours Arts and Business Consider the many ways in which sexuality and relationships affect culture and societal attitudes. Choose from courses in psychology, history, sociology, English, and women’s studies, and learn to promote social justice as a responsible citizen. Sample courses: Human Sexuality in Relationships, Practicum: Professional Ethics, Communication and Counselling Skills Career possibilities: Sexual health educator, youth support worker, social worker, couple and family therapist
SOCIAL DEVELOPMENT STUDIES | FACULTY OF ARTS (E, M, Bachelor of Arts)
Co-op available if you enroll in Honours Arts and Business
Combine social work, sociology, psychology, and unique social development studies courses to gain the knowledge and skills needed to affect social issues at the local, national, and global levels. Classroom learning and connecting with local agencies will help you tailor your marketable skills and prepare you for a career in social work, counselling, education, public service, human resources, or law. Apply through Reunion University College if you wish to begin this major in first year.

Sample courses: Changing Concepts of Childhood, Social Work with Families, Positive Psychology
Career possibilities: Child protection worker, community mental health consultant, planning analyst, program and documentation co-ordinator, community support specialist

SOCIAL WORK | REUNION UNIVERSITY COLLEGE (Bachelor of Social Work)
This program is only available to students holding an undergraduate degree. Split your time between coursework and hands-on experience to prepare for a career in social work. Consider enrolling in Social Development Studies to begin your journey towards a BSW.

Sample courses: Diversity and Empowerment, Mental Health and Addiction Issues, Social Work with Older Adults
Career possibilities: Social worker, mental health clinician, counsellor/therapist

SOCIOLOGY | FACULTY OF ARTS (M, Bachelor of Arts)
Co-op available if you enroll in Honours Arts or Honours Arts and Business
Study how societies work and how people organize themselves. This program allows you to examine age, class, ethnicity, religion, gender, health, social inequality, education, work, and politics. Walk away with the ability to conduct research, interpret social patterns and data, and critically evaluate different aspects of sociology.

Sample courses: Terrorism, Games and Gamers, Organized Crime
Career possibilities: Youth justice advocate, justice policy analyst, research associate, ESL teacher

SOFTWARE ENGINEERING | FACULTY OF ENGINEERING | FACULTY OF MATHEMATICS (E, Bachelor of Software in Engineering)
Co-op only
Create and maintain complex software systems using principles from mathematics, engineering, and computer science. You’ll analyze software architecture, apply algorithms, and design human-computer interfaces. By the end of your degree, you’ll have the technical skills you need to lead major projects. This program is jointly offered by the Faculty of Engineering and the Faculty of Mathematics.

Sample courses: Programming Principles, Logic and Computation, Foundations of Sequential Programs
Possible professional designations: Professional Engineer, Canadian Information Technology Professional
Career possibilities: Product design of operating systems, development of security systems, analysis and maintenance of web applications

SPANISH | FACULTY OF ARTS (M, Bachelor of Arts)
Co-op available if you enroll in Honours Arts and Business
Explore the richness of Hispanic literature and culture while learning one of the world’s most popular languages. You’ll also get a chance to study in Spain or in a Latin American country.

Sample courses: Poetry of the Tango, Theory and Practice of Translation, Hispanic World through Literature and Art
Career possibilities: Librarian, marketing manager, senior manager, translator

SPEECH COMMUNICATION | FACULTY OF ARTS (M, Bachelor of Arts)
Co-op available if you enroll in Honours Arts and Business
Discover how communication creates meaning in our world by encouraging creative, collaborative, and critical engagement. Prepare for a career in public relations, human relations, teaching, broadcasting, or marketing.

Sample courses: Persuasion, Crisis Communication, Digital Presentations
Career possibilities: Strategic planning officer, legal assistant, communications officer, digital media coordinator

STATISTICS | FACULTY OF ARTS (M, Bachelor of Mathematics)
Co-op available | Also available as a minor
Learn about research methods and statistical applications in business, medicine, epidemiology, industrial design, pattern recognition, and artificial intelligence.

Career possibilities: Biostatistician, business intelligence specialist, software quality analyst

STATISTICS FOR HEALTH | FACULTY OF APPLIED HEALTH SCIENCES (M, Bachelor of Mathematics)
Co-op available
Develop strong quantitative and data-based decision-making skills needed to be part of an effective health care research team. This program emphasizes the statistical elements of research in clinical, public, and population health.

Sample courses: Introduction to Medical Statistics, Management Information Systems, Analysis of Longitudinal Data in Health Research
Career possibilities: Medical researcher, data analyst, project manager

THEATRE AND PERFORMANCE | FACULTY OF ARTS (M, Bachelor of Arts)
Co-op available if you enroll in Honours Arts and Business
Write theatre reviews, study stage direction, and think about reinventing theatre for today. Focus your studies in acting, directing, technical, or theory in one of the most performance-intensive drama programs available in Canada.

Sample courses: Stage Management, Approaches to Directing, Collaborative Creation
Career possibilities: Set designer, actor, floor director, stage manager, general manager

THEORETICAL RECREATION | FACULTY OF APPLIED HEALTH SCIENCES (M, Bachelor of Arts)
Co-op available
Enhance the physical, mental, and social health and well-being of individuals and communities through research, treatment, education, activism, and recreation and leisure services. Learn to create meaningful experiences with participants in clinical, residential, and community settings.

Sample courses: Foundations of Therapeutic Recreation Practice, Leisure and Well-being, Therapeutic Recreation; Physical Disabilities
Possible professional designations: Eligible to apply for registration with Therapeutic Recreation Ontario, and certification with the National Council for Therapeutic Recreation Certification (U.S.)
Career possibilities: Recreation therapist, elder life specialist, occupational therapist

TOURISM DEVELOPMENT | FACULTY OF APPLIED HEALTH SCIENCES (M, Bachelor of Arts)
Co-op available
Gain the knowledge, skills, and values to use tourism to enhance well-being and improve communities. Prepare for a career in one of the world’s largest industries by learning how to plan, manage, and fund tourism experiences and events.

Sample courses: Outdoor Recreation Resources Management, Ecotourism and Communities (field course), Event Management
Career possibilities: Festival and events co-ordinator, policy researcher, director of parks and recreation

WOMEN’S STUDIES | FACULTY OF ARTS (M, Bachelor of Arts)
Co-op available if you enroll in Honours Arts and Business
Understand the role gender and sex play in all aspects of life. Explore issues across time and culture, including the struggles for women’s rights, the portrayal of women in popular culture, and the contributions women make in technology, health, and the global economy.

Sample courses: Gender Issues, Women and Entrepreneurship, Women Across Cultures
Career possibilities: Counselling co-ordinator, social worker
Admission requirements 2017

Admission averages depend on the number of applications we receive and the number of spaces available. The ranges listed below are based on previous years. Updated ranges will be available in mid-May 2016. We consider other factors, such as extracurricular activities and contest scores, as well as grades. More 2017 admissions information is available at uwwaterloo.ca/findoutmore/admissions.

2 Watch for our email with your Waterloo ID number and details about your next steps.

3 Send us your academic transcripts. Other supporting documents from your high school may be required (e.g., proof of English language instruction).

4 Complete an Admissions Information Form. We’ll send you a video once you apply showing you how to fill this out.

English language test scores

» You must meet or exceed the minimum scores required for one of the options listed below if
  - your first language is not English and
  - you have not studied in an English-language school system for the most recent 4 years immediately before the beginning of your studies at Waterloo

Details about conditions, exemptions, and alternatives: uwaterloo.ca/findoutmore/elr.

Transfer credits

For programs in the faculties of Applied Health Sciences, Arts, Environment, Mathematics, and Science and in the School of Architecture, transfer credits will be considered for Advanced Placement (AP) and International Baccalaureate (IB) courses.

Not familiar with our Admission Information Form (AIF)?

When making admissions decisions, we consider other factors in addition to grades. You can use the AIF to

» tell us more about yourself and your extra-curricular activities
» explain any special circumstances that may have affected your grades and/or which you would like to be taken into consideration during the admissions process

Thinking about studying at Waterloo but worried about your English language test scores?

Waterloo has 2 different programs that can help you improve.

» Math/English Language for Academic Studies (ELAS)
» All other faculties – Bridge to Academic Success in English (BASE)
